

ANSI Integra 1540 Series

Integra 1540 provides programmable measurement, display and communication of up to 31 major electrical and power quality parameters, including true RMS system values, total harmonic distortion (THD) measurement and power quality data. The meter offers simple user-friendly programming of voltage, current, and power measurement parameters using a menu driven interface. Status of all parameters can be viewed through 13 screens on the 3 line, 4 digit LED display. The Integra 1540 has pulsed and digital communication outputs and is ideal for all power and quality monitoring applications.

Features

- Measurement, display and communication of up to 31 power parameters
- THD measurement and power quality data
- True RMS measurement
- Pulsed energy outputs
- Digital communications
- Fully programmable PT and CT ratios
- Simple menu driven interface
- ANSI case style
- High quality LED display

Benefits

- Replaces multiple single function instruments
- Simple menu driven interface
- Remote monitoring
- Monitoring, control and protection of power assets

Applications

- Switchgear
- Distribution systems
- Generator sets
- Control panels
- Energy management
- Building management
- Utility power monitoring
- Process control
- Motor monitoring

Approvals

- cUL File No. E203000
- IEC 1010 / BSEN 61010-1

Operation

A two button interface on the front panel of Integra 1540 units provides simple programming of PT and CT ratio settings, configuration of selected communication options, and adjustment of operating parameters. To prevent unauthorized access to the product configuration settings, all set up screens offer password protection. Once configured, status information can be viewed by scrolling through 13 screens featuring a high contrast 3 line, 4 digit LED display, with separate annunciators for each of the 31 measured parameters. Optional pulsed or digital outputs allow status information to be communicated into building management systems.

System Input

Designed for all low, medium and high voltage switchgear and distribution systems, the Integra 1540 has customer programmable PT and CT ratio capability. Direct connected up to 600V AC with 5A CT inputs as standard, and 1A CT inputs available as an option.

Pulsed Outputs

Integra 1540 offers an optional pulse output module enabling the retransmission of time based demand parameters. Outputs are pulsed at a rate proportional to the measured kWh active energy, with pulse width and rate easily programmable via the set-up screens. The output relay has a fully isolated volt free contact, with connection via screw clamp terminals.

Digital Communications

RS485 Modbus RTU

Integra 1540 digital metering systems offer an RS485 communication port for direct connection to SCADA systems using the Modbus RTU protocol, or the Johnson Controls Metasys NII protocol. Remote monitoring enables the user to record the systems parameters in real time, using high resolution numbers. The Modbus protocol establishes the format for the master's query by placing it into the device address. The slave's response is also constructed using the Modbus protocol; it contains the fields confirming the action taken, the data to be returned, and an error-checking field. The Modbus option includes the ability to change Modbus word order to suit the requirements of the user.

Specification

Input	
Nominal Input Voltage:	57.7 to 346V L-N, 100 to 480 V L-L
Max Continuous Input Voltage:	120% nominal
Max Short Duration Input Voltage:	2 x for 1 second, repeated 10 times at 10 second intervals
System PT Ratios (primary):	400kV or 360MW **
Nominal Input Voltage Burden:	< 0.2 VA
Nominal Input Current:	5A (1A option)
System CT Primary Values:	9999:5A or 9999:1A max 360MW **
Max Continuous Input Current:	120% nominal
Max Short Duration Current Input:	20 x for 1 second, repeated 5 times at 5 second intervals
Nominal Input Current Burden:	< 0.6 VA
Outputs	
RS485 Communications:	Two wire half duplex
Baud Rates:	2400, 4800, 9600, 19200
Pulsed:	Clean contact SPNO, 100V DC 0.5A max
Pulse Duration:	60, 100 or 200 milliseconds
Auxiliary	
Standard Nominal Supply Voltage:	100 V – 250 V AC or DC (85 V – 287 V AC Absolute) (85 V – 312 V DC Absolute)
AC Supply Frequency Range:	45 – 66 Hz
AC Supply Burden:	6VA
Optional Auxiliary DC Supply:	12 V - 48 V DC (10.2 V – 60 V DC Absolute)
DC Supply Burden:	6VA
Measuring Ranges	
Voltage:	50 .. 120% of nominal (functional 5..120%)
Current:	5 .. 120% of nominal (50%..120% for THD)

Wiring

Input connections are made to screw clamp terminals. Terminals for both current and voltage connections are sized to accept two #9 AWG (3mm²) solid or stranded wires, or ring lugs suitable for 6-32 screws. Connections for communications and pulse outputs use identical style terminals.

Auxiliary Supply

The Integra family should ideally be powered from a dedicated supply, either 100 – 250V AC or DC (85V – 280V AC Absolute or 85V – 312V DC Absolute) or 12-48V DC (10.2V – 60V DC Absolute). However the device may be powered from the signal source, provided the source remains within the working range of the chosen auxiliary supply.

Fusing

It is recommended that all voltage lines be fitted with 1 Amp fuses.

Safety / Ground Connections

For safety reasons all CT secondary connections should be grounded in accordance with local regulations.
