

## SPLIT-CORE CURRENT SENSOR

SC-650

### PRODUCT DESCRIPTION

The SC-650 Series current sensors monitor line current for electrical loads such as pumps, conveyors, machine tools, or fans and output a 0-5 Vdc signal to represent the load current.

The SC-650 require no external power as they are totally powered by induction from the AC line being monitored.

The sensors are typically used to monitor motor operation and can be used to determine motor failure, belt loss, machine feed rates or tool wear.

### TYPICAL INSTALLATION

**For complete installation and wiring details, please refer to the product installation instructions.**

The SC-650 series must be mounted in an electrical enclosure and has an removeable integral mounting tab to allow either screw mount to a surface or spring mount to a DIN rail.

The SC-650 series has a 2 wire connection to the Building Automation System.
